ULTIMATE FRAUD DETECTION

«We know that part of our traffic is fraudulent.
The question is what part?»

FraudScore

Online ad spending is growing every year and mobile already outscores desktop.

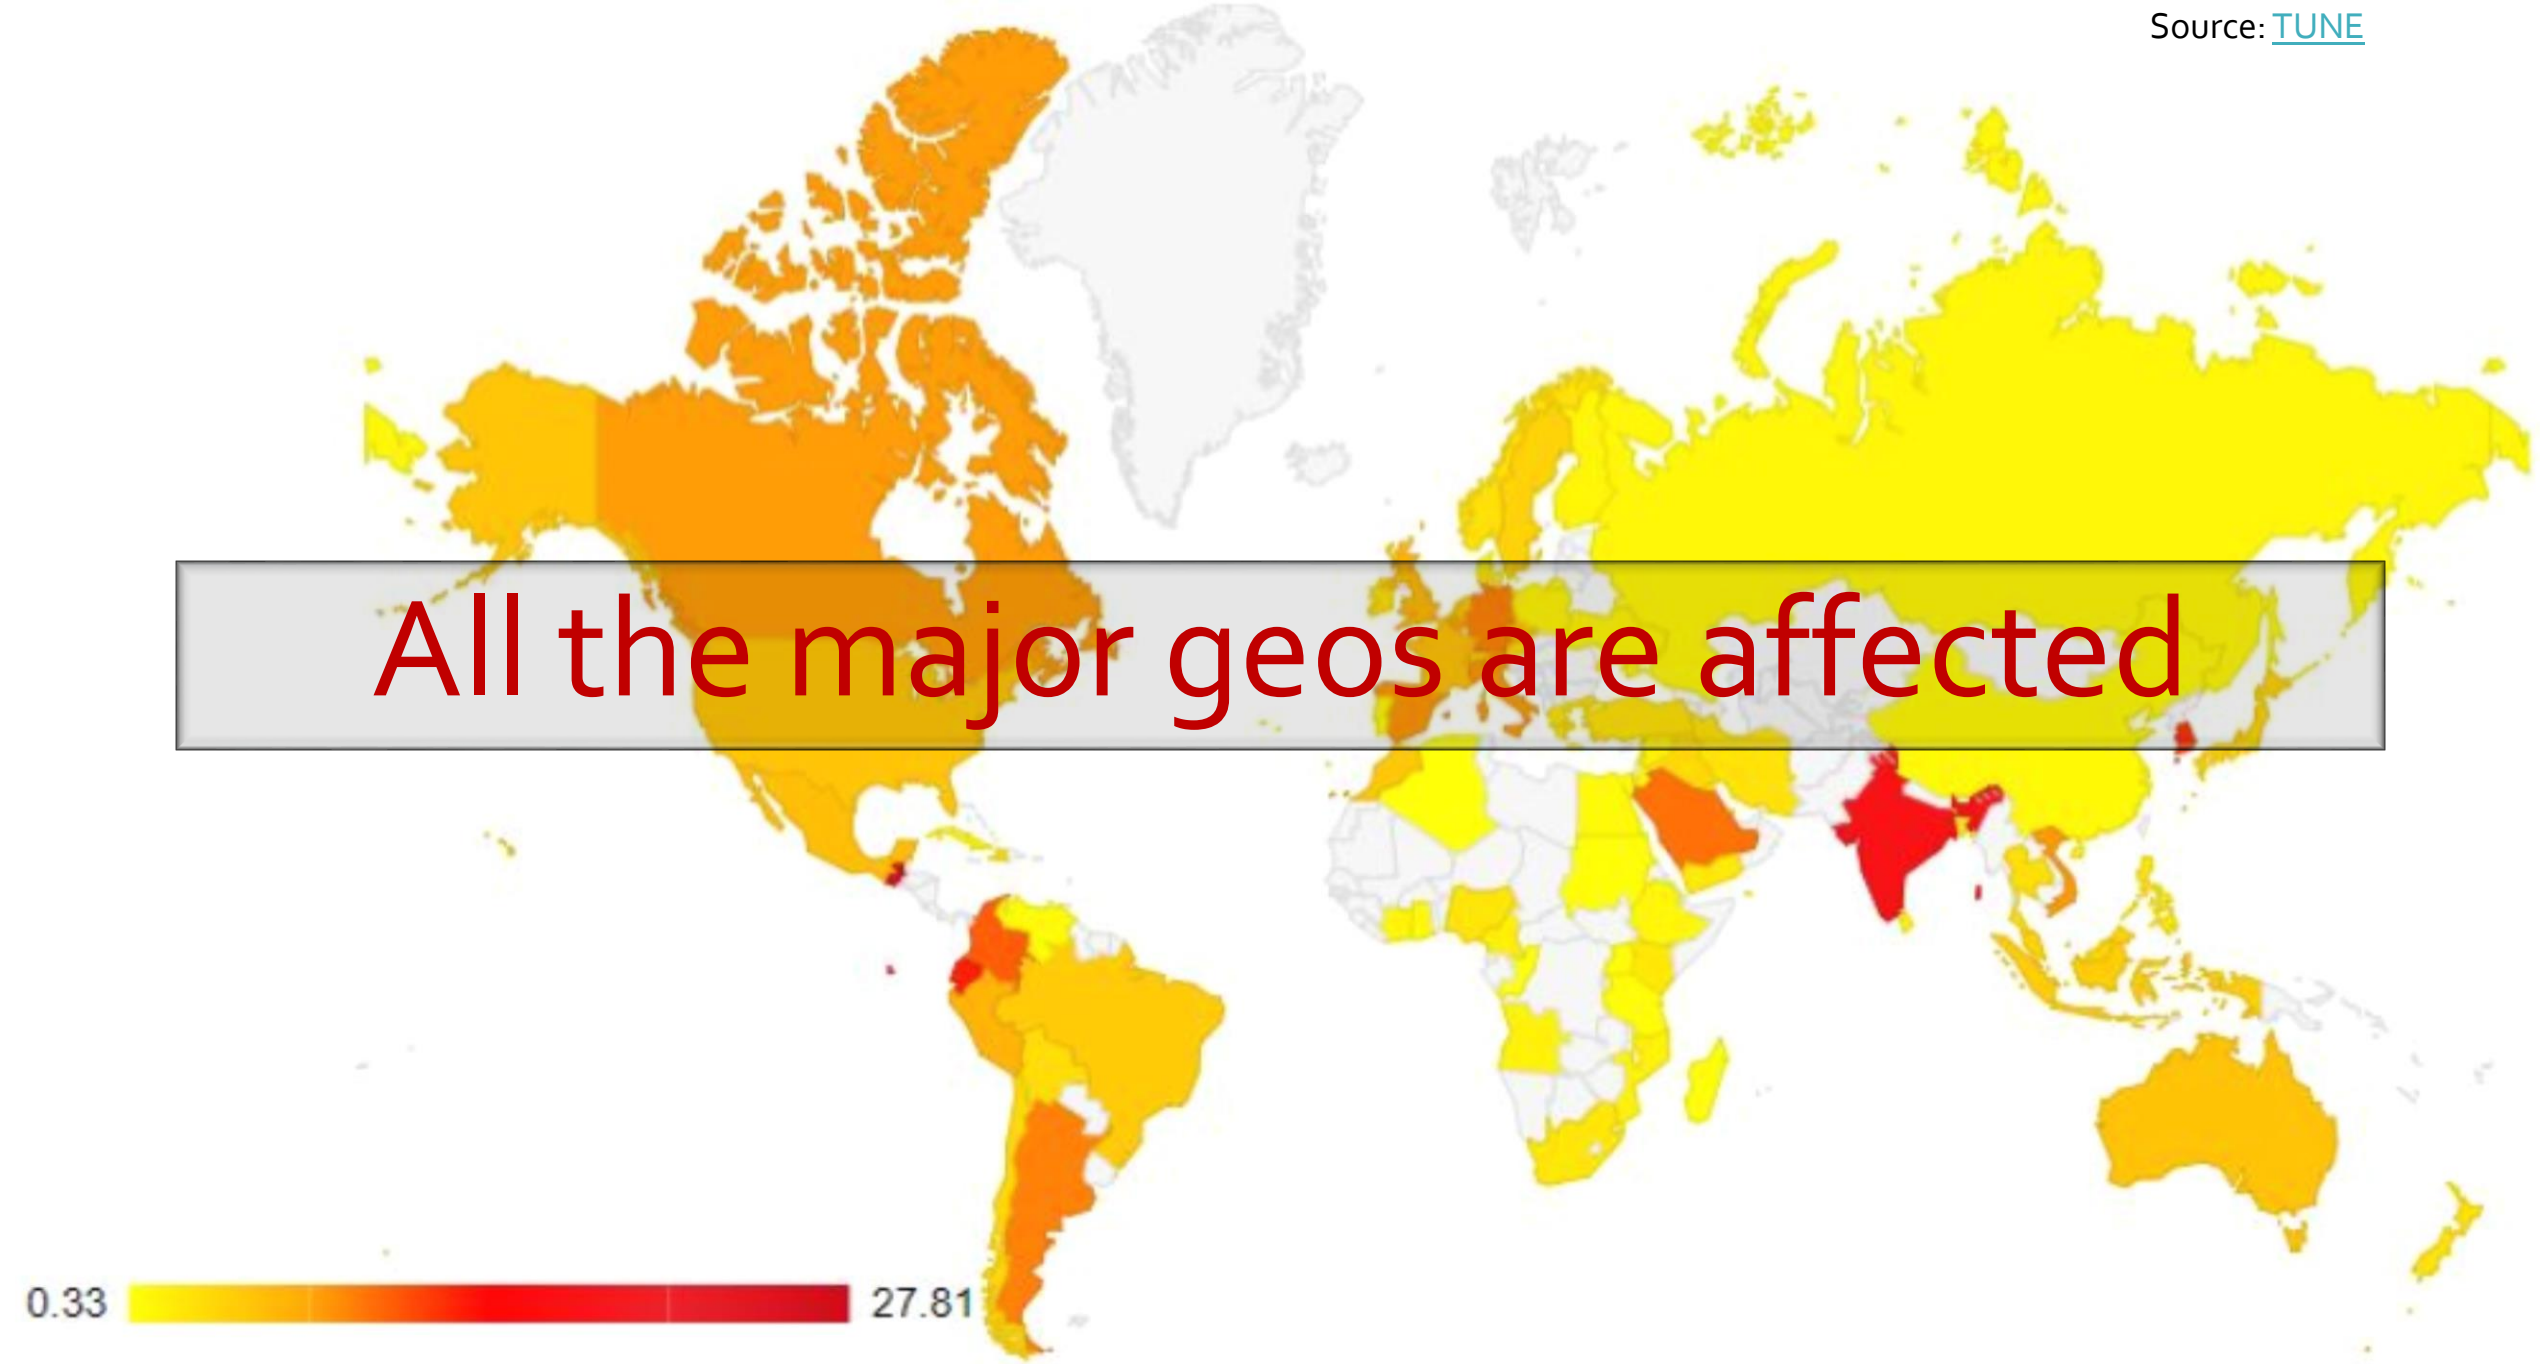

As more money is poured into online advertising, the incentive to try and steal it grows.

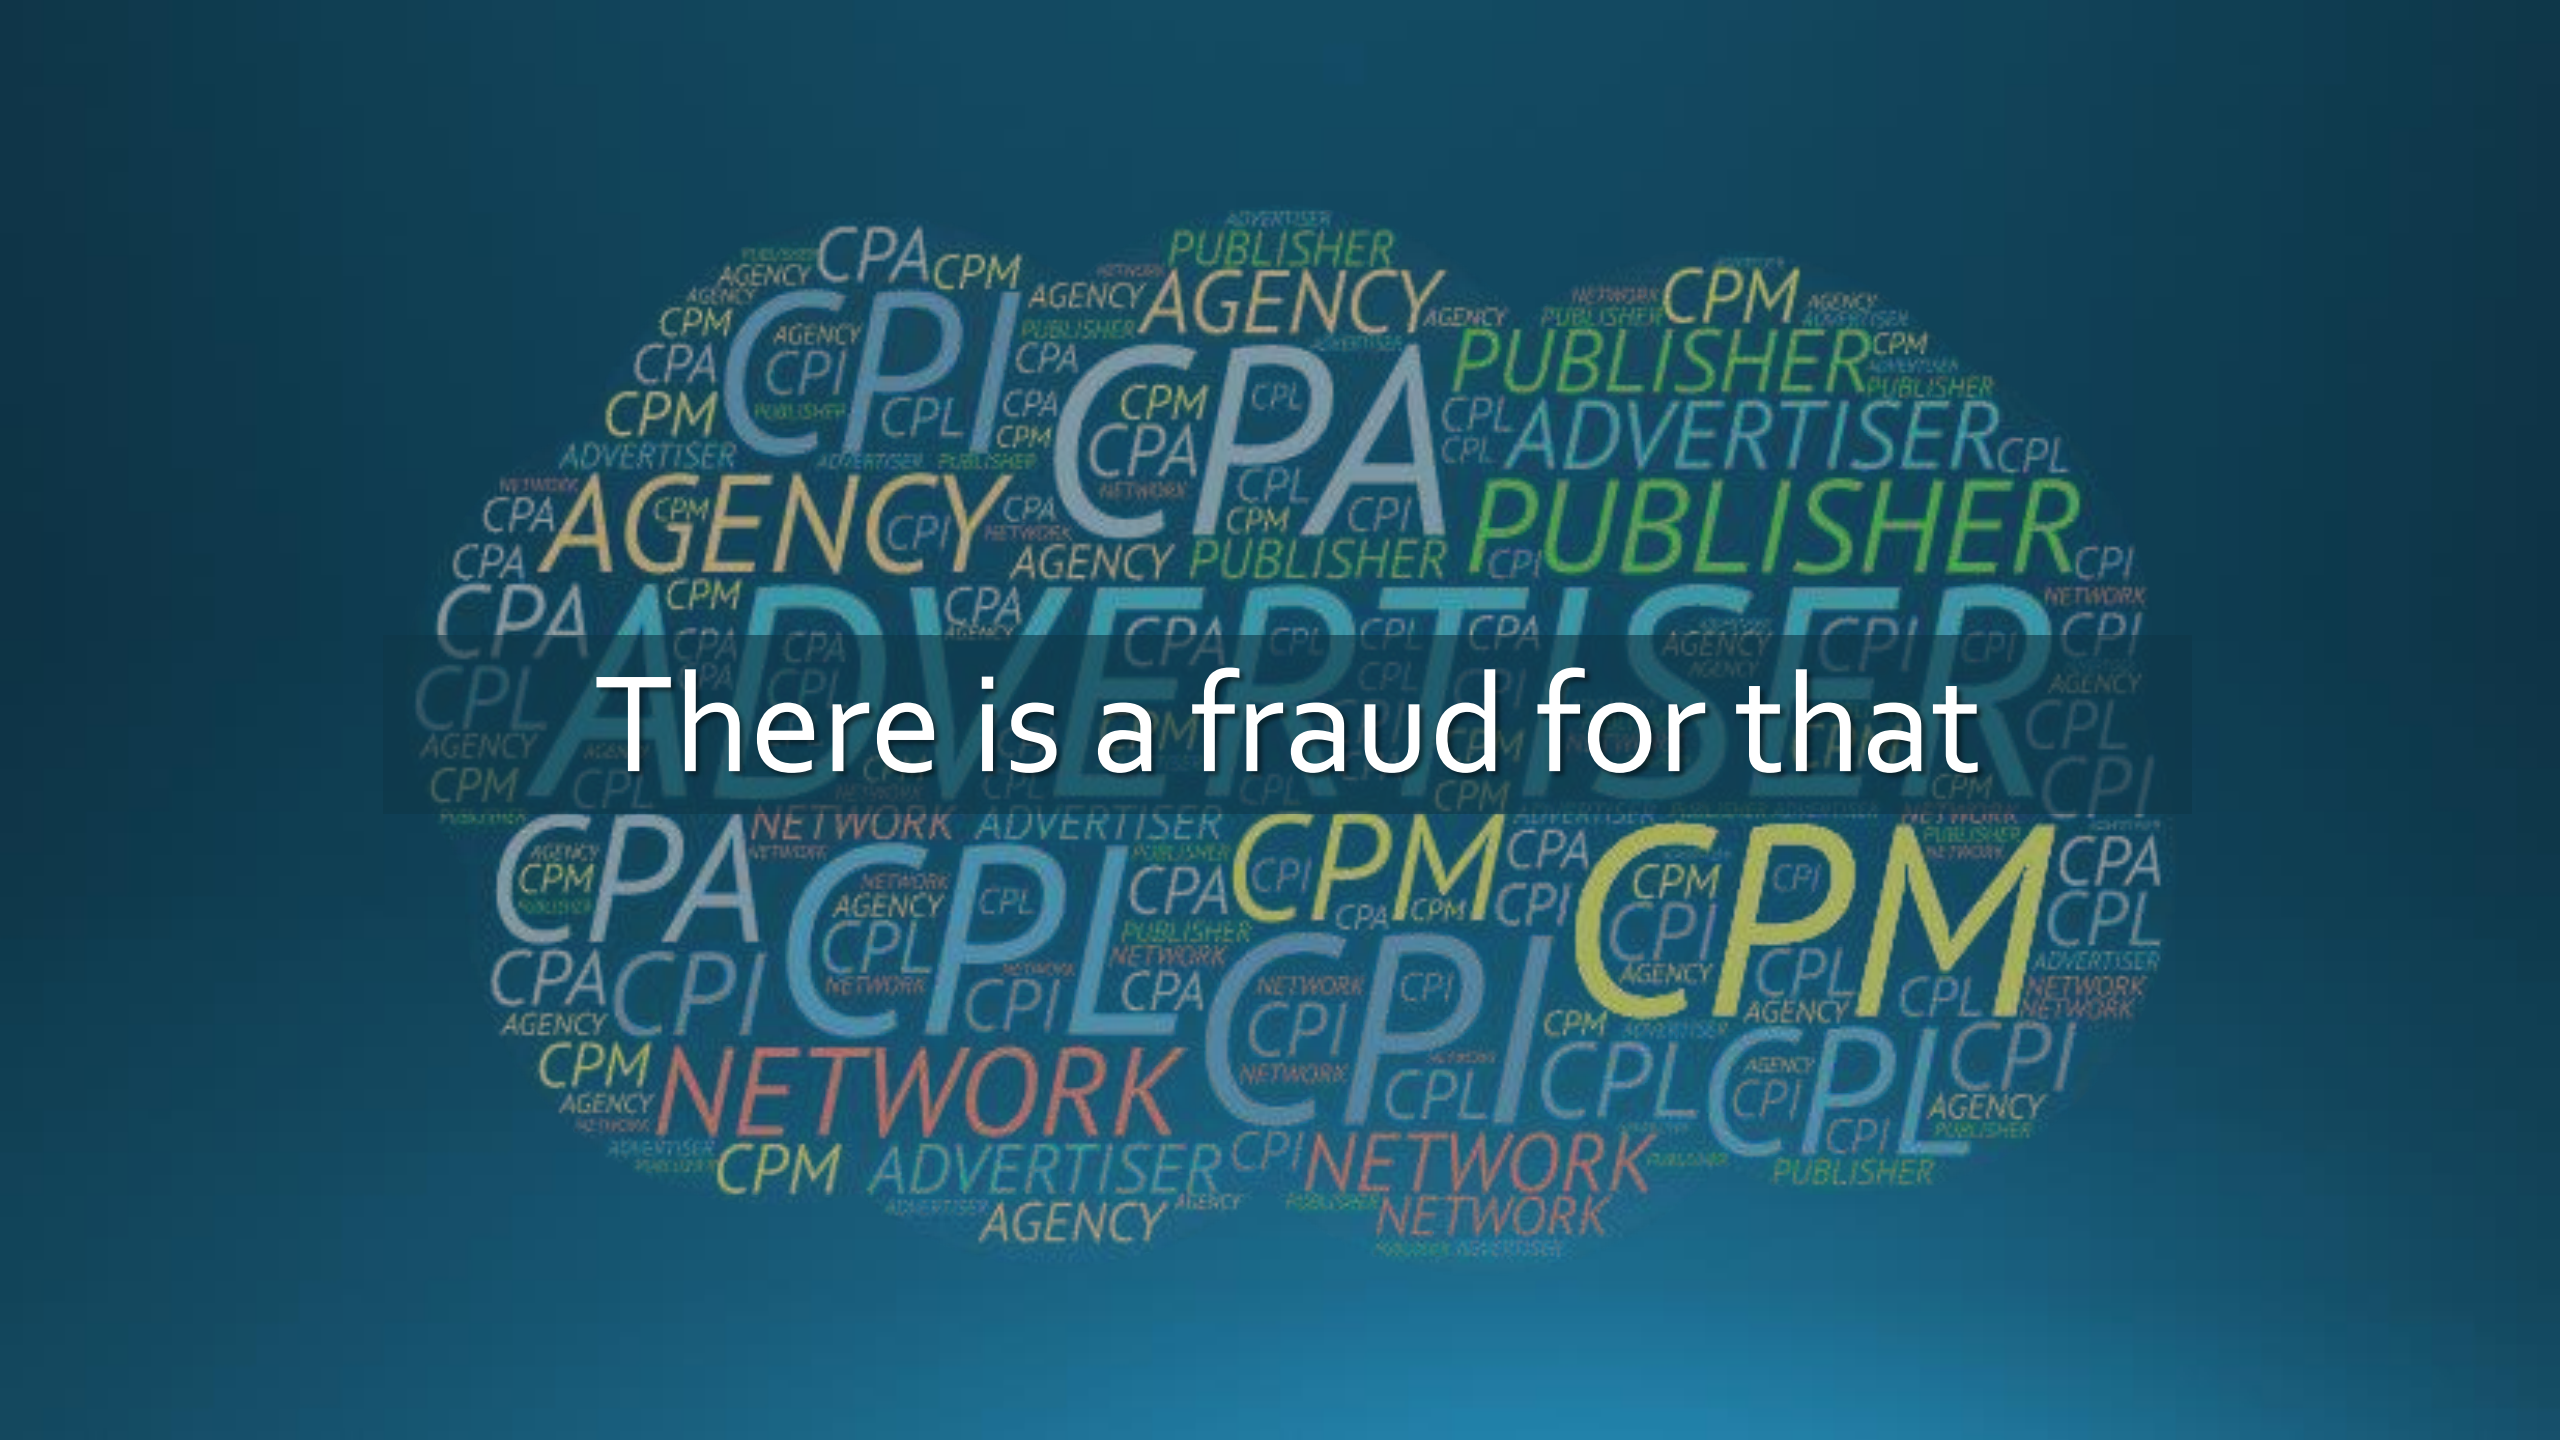

2017: Global app install fraud is 7.8% and will cost marketers up to $2B*

Our customers

"

FraudScore has easy to handle APIs which permitted us to integrate fraud analysis findings into our own dashboards. Their own interface is very intuitive and offers infinite possibilities in terms of filtering and digging into data. FraudScore team is very receptive to users feedback and continuously introduces improvements to their product.

"*Fraudscore has been our first line of defense against measuring questionable traffic. As the mobile digital advertising landscape continually expands, it becomes complex as it relates to user attribution measurement. The need for precise data has never been more important to the success of our business and our clients marketing efforts. FraudScore's engineers made integration seamless and user friendly. The user interface allows us to interpret the data correctly and in real-time to make the right decisions as it relates to protecting our clients brand integrity. I highly recommend their services.*"
