SAFECLICK / FRAUDSCORE BRAND FAMILY

SafeClick Brand Palette

Final palette — Graphite, Gray & Green. Clear structure, bright accents.

1. Logo Applications

The full logo is the default. Use full-color on White or Cool Gray and reversed on Graphite. Use the mark alone only in compact or square placements where SafeClick is already identifiable. Preserve clear space.

SafeClick

FULL-COLOR LOGO • LIGHT
Graphite wordmark + Emerald mark

SafeClick

REVERSED LOGO • GRAPHITE
White wordmark + Emerald mark

MARK ONLY • COMPACT USE
For icons, avatars and square placements

2. Color Palette & Roles

Graphite provides the dark foundation. Dark Soft Blue supports secondary text, icons and neutral gradients; Soft Blue provides its lighter counterpart. Emerald accents highlight actions. White and Cool Gray keep backgrounds light.

GRAPHITE
#111111
Brand headings and dark blocks

DARK SOFT BLUE
#526783
Secondary text, icons and neutral gradients

SOFT BLUE
#B9D6FF
Secondary accents on dark surfaces

EMERALD
#007F59
Primary color accent

LIGHT EMERALD
#63E6AB
Highlights and light accents

Use White and Cool Gray for backgrounds. Use Graphite for headings and dark blocks. Dark Soft Blue supports secondary text, icons and neutral gradients; Soft Blue is its light accent on Graphite. Keep Emerald for actions and primary accents.

3. Readable Color Pairs

Clear signals.

Graphite on Cool Gray #F3F5F7
17.28:1 · AAA normal text

Clear signals.

Soft Blue on Graphite
12.70:1 · AAA normal text

Clear signals.

Graphite on Light Emerald
12.08:1 · AAA normal text

4. Brand Gradients

Signature Gradient leads SafeClick hero and marketing surfaces. Supporting Gradient / Blue Depth brings a cooler technology accent to product and technical content.

SAFECLICK SIGNATURE GRADIENT

Graphite depth. Green signal.

Graphite → Emerald → Light Green

PRIMARY · hero, campaigns, key messages

SUPPORTING GRADIENT / BLUE DEPTH

Graphite depth. Blue clarity.

Graphite → Dark Soft Blue → Soft Blue

SECONDARY · product, technical and supporting surfaces

RULE · Use one gradient per surface. Keep at least half of either gradient in Graphite for contrast and clarity.

5. Marketing Applications

LIGHT CANVAS

Know your traffic.

Dark Soft Blue on the light canvas.
One color for accents and readable text.

Request early access

DARK CANVAS

See every signal.

Light Emerald.
Soft Blue labels; Light Emerald action.

Request early access

SCOPE · Five-color palette, dark to light: Graphite, Dark Soft Blue, Emerald, Light Emerald and Soft Blue. White and Cool Gray remain canvas colors. Product UI feedback semantics remain separate.

SAFECLICK / FRAUDSCORE BRAND FAMILY

SafeClick Typography

Rubik for headings and labels. Roboto for clear, readable body copy.

Typography

MARKETING HIERARCHY

Know your traffic. Act with clarity.

Every signal. One clear decision.

Simple language for complex traffic

SafeClick turns complex traffic signals into clear insights, helping teams understand quality and take action faster.

Rubik shapes the distinctive voice in headings and labels. Roboto keeps longer text calm, neutral and easy to read.

SAFECLICK • TRAFFIC QUALITY

Know what drives real growth

Turn every traffic signal into a clearer growth decision.

Clear signals

Rubik Display

HEADINGS · NAVIGATION · CTA

Know your traffic. Act with clarity.

See every signal without unnecessary complexity

Overview **Solutions** **Request access**

Roboto Text

BODY · SUPPORTING COPY · METADATA

Clear signals help teams understand traffic and act with confidence.

Supporting explanations stay calm, direct and easy to scan.

Traffic quality · Updated 2 min ago

Use SafeClick/* styles for marketing surfaces. Rubik leads headings and labels; Roboto supports longer text. Hierarchy comes from weight, size and spacing.

Style Inventory

All 15 specimens are linked to their actual SafeClick/* Text Styles. Labels show font size / line height and, where defined, the website CSS role.

SafeClick/Display/XL • 66/70 • Rubik • var(--sc-type-display-xl)

SAFECLICK / BRAND SYSTEM

Semantics & Usage

Accessible color pairs, role boundaries, and practical usage rules

1. Semantic Pairs

Recommended foreground and background combinations for marketing and documentation surfaces.

TRUSTED DARK SURFACE

Clear traffic. Clear decisions.

White text stays crisp on Graphite.

Graphite Dark Surface

Soft Blue / Graphite · 12.70 : 1 · AAA

Light Green / Graphite · 12.08 : 1 · AAA

White / Graphite · 18.88 : 1 · AAA

COOL TECHNOLOGY ACCENT

Supporting information

Use Graphite for text and icons.

Soft Blue Surface

Graphite / Soft Blue · 12.70 : 1 · AAA

CALM CONTENT SURFACE

Readable by default

Dark Soft Blue supports secondary copy.

Cool Gray Surface

Graphite / Cool Gray · 17.28 : 1 · AAA

Dark Soft Blue / Cool Gray · 5.30 : 1 · AA

Emerald / Cool Gray · 4.60 : 1 · AA

HIGH-VISIBILITY ACTION

Make the next step clear

Use Graphite for text and icons on Light Green.

Light Green Action Surface

Graphite / Light Green · 12.08 : 1 · AAA

Used for primary actions, short emphasis, and compact highlighted areas.

2. Accessibility & Role Boundaries

Color meaning stays explicit: brand expression, traffic-quality signals, and UI feedback use separate roles.

USE

High-contrast combinations

- White on Graphite for dark surfaces
- Graphite on Soft Blue for badges and highlights
- Dark Soft Blue on Cool Gray for secondary copy
- Light Green as a short accent on Graphite

AVOID

Low-contrast or ambiguous roles

- Soft Blue text on White — 1.49 : 1
- Light Green for long text on light backgrounds
- Brand Green as a replacement for UI Success
- Multiple gradients behind body copy

3. Usage Rules

Operational rules moved from the palette sheet and expanded for everyday marketing use.

CONTRAST

Start with readable pairs

Dark Soft Blue + Cool Gray = 5.30 : 1. Graphite + Soft Blue = 12.70 : 1. Use Graphite for text on Soft Blue.

SIGNALS

Keep risk meaning explicit

Green, orange and red remain traffic-quality colors in charts and reports. Labels and icons must carry meaning without color alone.

BRAND FAMILY

Share principles, keep identity

Rubik / Roboto and disciplined spacing connect the family. Graphite and green establish SafeClick as a distinct product.

GRADIENTS

One gradient per surface

Use Signature Green for key marketing moments and Supporting Blue for product or technical content. Keep at least half Graphite.

SAFECLICK / BRAND SYSTEM

Marketing Patterns & Applications

Flexible compositions for campaigns, reports, presentations, and social content

1. Hero Surfaces

Use gradient as a focused field, leaving enough Graphite for clear typography and brand recognition.

SIGNATURE GREEN

Know what drives real growth

Lead with one confident message and a focused green transition.

PRIMARY · campaign / landing hero

SUPPORTING BLUE

Every signal, made clearer

Use for technical narratives, reports, and supporting product stories.

SUPPORTING · report / product story

2. Metric & Proof Cards

One number, one label, one short explanation. Color supports hierarchy without becoming a status code.

TRAFFIC QUALITY

86%

clean traffic identified

One proof point per composition

GROWTH SIGNAL

+27%

valid conversions

One proof point per composition

DECISION SPEED

3×

faster review workflow

One proof point per composition

3. Split Layouts

Separate message and proof into clear planes. Avoid blending green and blue inside the same composition.

EDITORIAL SPLIT

Lead with clarity

Whitespace carries the explanation; the gradient plane carries one proof point.

86%

single proof point

TECHNICAL SPLIT

Build trust

Use Supporting Blue for reports and product narratives that need a cooler tone.

3×

single proof point

4. Type & Accent Treatments

Keep the sentence readable without color. Accent one short phrase, never an entire paragraph.

LIGHT SURFACE

See every signal
your traffic

Use the accent as emphasis, not decoration.

DARK SURFACE

Know what drives
real growth

The supporting color remains secondary to the message.

5. Application Checklist

01
ONE MESSAGE
Choose one headline and one proof point.

02
ONE GRADIENT
Use Signature Green or Supporting Blue.

03
CLEAR CONTRAST
Keep text on a stable color field.

04
EXPLICIT MEANING
Do not rely on color alone for status.
